

## Release notes 21

### Integrations with third-party systems:

- Raido: The sync interval has now been changed to 10 minutes from 5.

### New functionality:

- Attendance list: now comes with searchable select and also with the option to select a different instructor than the logged in user. Attendance list reports have also been improved.
- Home: now has a LIFUS tab that shows ongoing and finished LIFUS for the individual crew member.
- Roles: have now been divided into Roles/Location/Department – for improved usability. This will allow bigger organizations to divide and filter different/same records and reports.
- Send log to Crewdox: a button has been added for sending in feedback in order to quickly and more accurately see and solve possible bugs in the system.
- Reports: records report now has the ability to generate reports with a combination of roles.

### Significant updates and changes:

- Email reminders: can now also be sent after the records expiry date.
- LIFUS: now possible to delete an already submitted sector.
- LIFUS: comments gets highlighted on LIFUS types with forms.
- Form builder: now possible to duplicate an existing form.
- Attendance list: now has a history tab for submitted lists.
- Inbox: attendance lists now has the same functionality as forms.

**Minor updates:**

- Crew: now possible to remove documents in the crew modal.
- General: Minor UX and text adjustments have been made on both iPad and desktop..
- LIFUS: form list is now sorted in alphabetical order.
- External certificate: the script for reading incoming certificates was improved.

**iPad app:**

- Attendance list: searchable select lists and history tab has been added.
- LIFUS: Increased comment size on LIFUS sectors.

**Bugfixes:**

- API: increased timeout limits for most connections to 30 seconds from 6.
- Aircraft: now possible to register new aircraft again.
- Events: problem with checklists not updating is now solved.
- Events: problem with opening event documents on iPad is now solved.
